As a skilled MERN stack developer, I specialize in building robust and scalable web applications. With expertise in MongoDB, Express.js, React.js, and Node.js, I deliver high-quality, user-friendly solutions. My experience includes optimizing performance, enhancing security, and collaborating effectively with cross-functional teams. Passionate about continuous learning, I stay updated with industry trends to bring innovative ideas to every project.

Skills & Qualifications

- Deep understanding and hands-on experience with MongoDB, Express.js, React, and Node.js for full-stack web development.

- Advanced knowledge of JavaScript, including ES6+ features, and experience with asynchronous programming, closures, and higher-order functions.

- Proficient liquid language developer for Shopify themes.

- Strong skills in designing and developing RESTful APIs, as well as integrating third-party APIs and services.

- Proficient in using Git for version control, with experience in collaborative development workflows, branching, and merging.

- Ability to create responsive and mobile-first web applications using CSS frameworks like Bootstrap, as well as pre-processors like SASS or LESS.

Tech Stack

- **Languages**: Javascript, NodeJS, Python, SQL, Java.
- **Backend Frameworks:** Express, NestJS, Django, Spring Boot.
- **Frontend Frameworks**: React, NextJS, React Native.
- **Databases:** MongoDB, MySQL, PostgreSQL, Prisma, Firebase, Supabase.
- **Other**: Redux, Vercel, Heroku, AWS, Appwrite, Stream, Cloudinary, Stripe.

Work History

FRONTEND TECH INSTRUCTOR | ETIWA TECH

10/2023 - 02/2024

As a passionate and innovative Frontend Tech Instructor at Etiwa Tech, I played a pivotal role in shaping the future of aspiring web developers. Leveraging my expertise in HTML, CSS, JavaScript, and modern frontend frameworks, I delivered comprehensive and engaging courses designed to equip students with the skills needed to excel in the fast-paced tech industry.

- Designed and continuously updated a cutting-edge curriculum that covered the latest trends and technologies in frontend development, ensuring students received the most relevant and industry-standard education.

- Conducted interactive and practical training sessions, enabling students to gain hands-on experience in building responsive and user-friendly web applications.

- Provided one-on-one mentorship and career guidance, helping students navigate their learning paths, overcome challenges, and achieve their professional goals.

BARELYHUMAN ORGANIZATION | FULLSTACK DEVELOPER

01/2024 - 03/2024

As a dynamic Fullstack Developer at BarelyHuman Organization, I harnessed my expertise in Liquid language, Tailwind CSS, and modern payment integration technologies to create seamless and engaging e-commerce experiences. My role was instrumental in developing and deploying robust, scalable solutions hosted on Shopify, tailored to enhance user engagement and streamline online transactions.

- Designed and developed custom Shopify themes using Liquid language and Tailwind CSS, creating visually appealing and highly functional storefronts.

- Implemented secure and efficient payment gateways, integrating GPay, ShopPay, and PayPal, ensuring a smooth and trustworthy transaction process for customers.

- Managed both frontend and backend development, optimizing site performance and ensuring a cohesive user experience across all devices.

- Developed bespoke features and functionalities tailored to the unique needs of BarelyHuman's e-commerce platform, enhancing user interaction and satisfaction.

- Deployed and maintained Shopify sites, ensuring high availability, scalability, and security, while providing ongoing technical support and optimizations.

- Worked closely with designers, marketers, and other stakeholders to align technical implementations with business goals and user expectations.

TECH INNOVATE SOLUTIONS| JUNIOR DEVELOPER

03/2023 - 09/2023

At Tech Innovate Solutions, I developed responsive web apps using the MERN stack, optimized RESTful APIs, improved front-end performance, and implemented secure authentication features. I also participated in

code reviews, managed MongoDB databases, and conducted thorough
testing.

- Collaborated with senior developers to design and implement
  responsive web applications using the MERN stack (MongoDB,
  Express.js, React.js, Node.js).

- Developed RESTful APIs to handle CRUD operations for various web
  applications, improving data management efficiency by 20%.

- Participated in code reviews, contributing to code quality
  improvements and adherence to best practices.

- Implemented authentication and authorization features using JWT
  and OAuth, enhancing application security.

- Optimized front-end performance by implementing lazy loading and
  code splitting, resulting in a 30% reduction in load times.

- Worked with version control systems like Git and collaborated
  using platforms like GitHub and Bitbucket.

- Assisted in database design and management using MongoDB,
  creating efficient schemas and optimizing queries.

- Conducted unit and integration testing using tools like Jest and
  Mocha to ensure application reliability and stability.

- Engaged in continuous learning through participation in tech
  meetups and online courses to stay updated with industry trends
  and advancements.

JUNIOR FULL-STACK DEVELOPER | NEXATECH SOLUTIONS

08/2022 - 02/2023

At NexaTech Solutions, I built full-stack web apps with the MERN
stack, automated deployments, integrated third-party APIs, and

collaborated with designers. I also debugged software issues and participated in agile workflows.

- Developed full-stack applications utilizing the MERN stack, delivering features that enhanced user engagement and experience.

- Created dynamic user interfaces with React.js, improving usability and accessibility across various devices.

- Integrated third-party services and APIs, expanding the functionality of web applications and improving user satisfaction.

- Collaborated closely with UX/UI designers to ensure the technical feasibility of designs and maintained consistency across the application.

- Automated deployment processes using CI/CD pipelines with tools like Jenkins and Docker, reducing deployment time by 40%.

- Debugged and resolved software bugs, ensuring smooth operation and functionality of applications post-deployment.

- Contributed to the development of internal tools to streamline workflows and increase productivity for the development team.

- Maintained comprehensive documentation for codebases and application features, facilitating knowledge sharing and onboarding of new team members.

- Participated in agile development practices, including sprint planning, daily stand-ups, and retrospectives, contributing to efficient project management and delivery.
